I am a Google Developer Expert in Angular and Web Technologies, and a driven software engineering leader with business management experience.

I enjoy learning, teaching, writing and mentoring teams.

I founded and share best practices and expert software engineering advice on lookout.dev

Experience:

- Front-end JS: 14y
- React: 3y
- AngularJS: 2y, Angular: 3y
- Node.js: 5y
- NestJS: 2y
- TypeScript: 5y
- Scss and less: 5y
- SQL (TSQL and MySQL): 16y
- MongoDB with mongoose: 4y
- REST: 6y
- Apache and IIS: 14y
- AWS: 6y
- JIRA: 6y

What makes me unique:

I understand business and can align technical solutions and strategies with business objectives, both short-term and long-term.

Work Experience:

- 2019-present: Principal Architect, LiveLoveApp
- 2018-2019: CTO, BrieBug Software
- 2016-2019: Freelance Software Architect, Self-employed
- 2008-2016: CTO, Webucator, Inc
- 2005-20018: Web Integration Specialist, Hamilton College

Education:

- M.B.A
State University of New York Polytechnic Institute, 3.8 GPA
- BS in Computer Information Systems
State University of New York Polytechnic Institute, 3.6 GPA

Accomplishments:

- Creator of lookout.dev, a community of software engineers sharing best practices and expert advice.
- Speaker at local meetups across the country and at web technology conferences in the US and Europe focusing on progressive web applications, web performance, build tools, software architecture, and mobile development.
- Principal architect and technology leader for multiple software projects and teams.
- As the CTO at BrieBug, I provided expert consulting to Fortune 100 companies to build application that are maintainable, testable and performant.
- As the CTO at Webucator, we were listed on the Inc. 5000 list for 3 years.
- I designed and built an internal CMS for Webucator. It runs a \$5m company with hundreds of trainers and thousands of clients.
- Launched app on iOS, Android and Facebook with a fantastic team of developers at Electrotank (now High 5 Games).
- I blog at brianflove.com where I write about topics such as: Angular, React, TypeScript, the MEAN stack, JavaScript and more.
